SKILLS GAP TRAINING
Workforce training solutions and critical skills development

> 87% of workers believe they need to get training and develop new job skills to keep up with changes in the workplace.
> — *Pew Research Center 2016, The State of American Jobs*

Why?

In our work with corporate partners, the vast majority of need is in skills gap training, targeting critical skills development with stackable, threaded learning options and no set up costs.
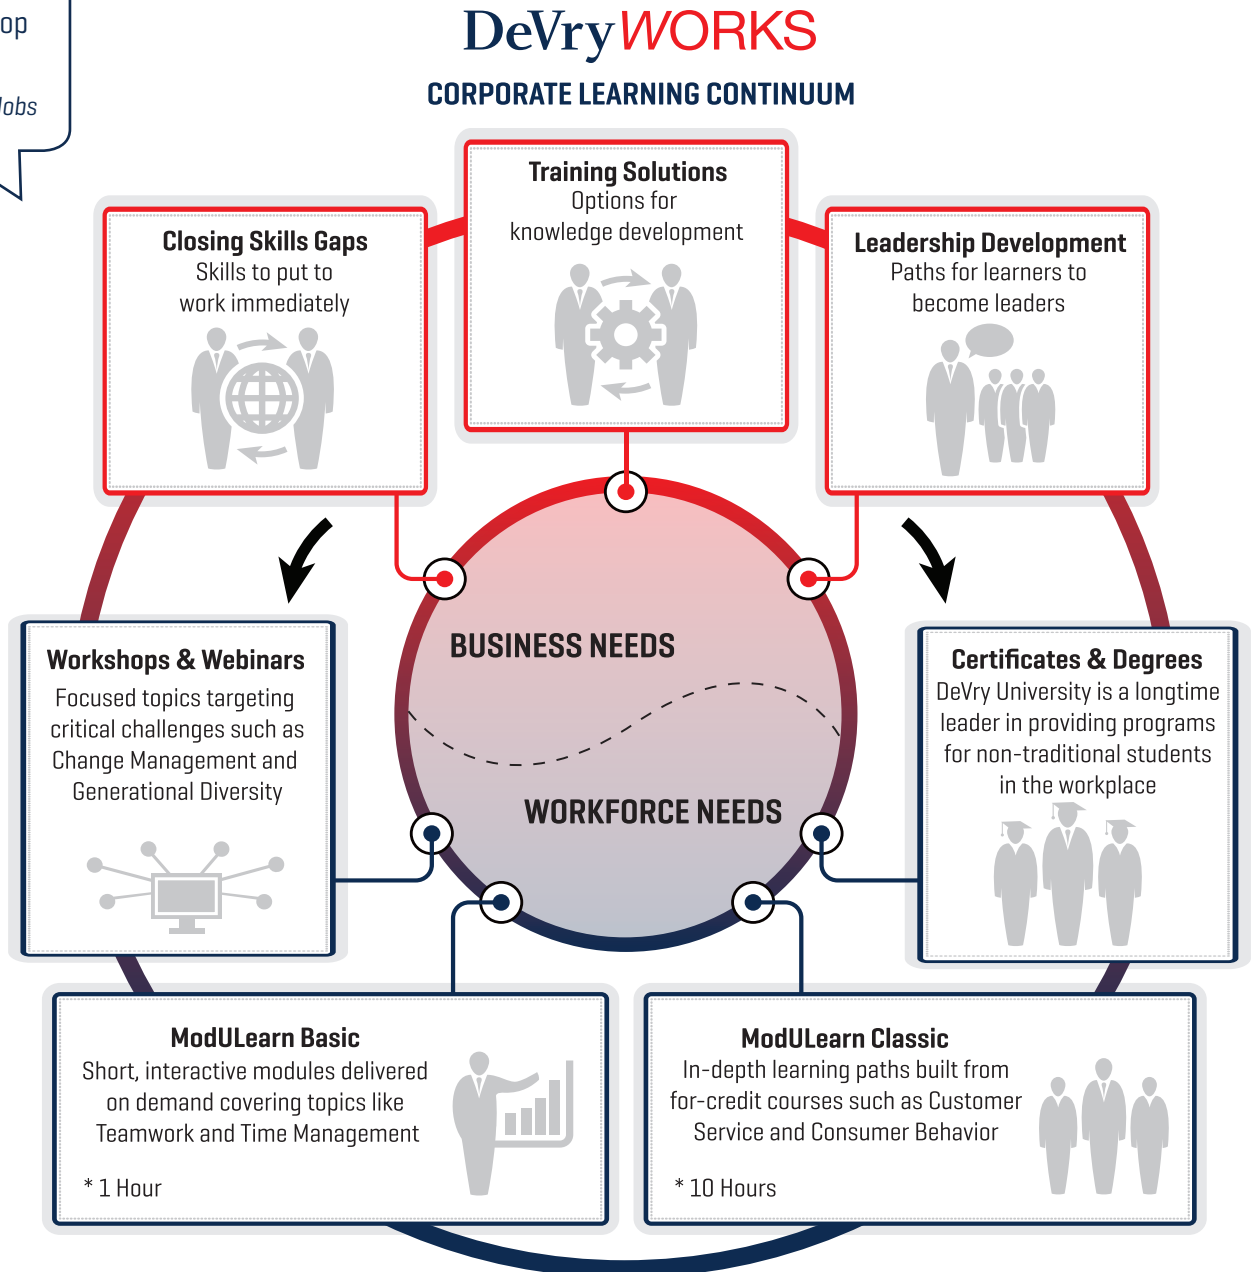

What?

ModULearn: A comprehensive, corporate training approach that offers tailored solutions for helping employees develop the skills they need. Our short, focused, "stackable" training and development content can empower employees to self-innovate and thrive within your organization and to help you build a highly agile and skilled workforce.

Partner Benefits:

Consultative Partnering – We address your needs with tailored, tech-forward learning paths to develop knowledge and skills that correspond with work place opportunities with no up front costs.

Reporting/Analytics – We provide regular reports so you can track usage and results.

Turnkey solution – We register students and handle program administration.

SKILLS GAP TRAINING
Workforce training solutions and critical skills development

Below is an example of how our unique consultative approach creates solutions to help you close your skills gap and address critical business challenges.

Business Challenge:

Facing increased costs and attrition, leadership needs to improve their communications skills with front line employees

Proposed Learning Path:

START → Communication (Workshop) → Verbal Communication (Basic) → Listening Skills (Basic) → Workplace Communication (Basic) → Refining the Communication Approach (Classic) → **FINISH**

About 14 hours to complete path.

Learning Objectives that Participant can Expect:

· Identify how to communicate effectively

· Understand listening techniques to improve message delivery

· Gain valuable skills to communicate across different generations and cultures

· Learn various methods for using audience-centered communication in everyday life

84% of leaders said those who know how to use the right tools in their fields are more effective.
